

Intercept KeyPress on UserForm - Escape - Enter

<https://stackoverflow.com/a/31124960/5079799>

Notes:

- KeyUp = When Key Is Released
- KeyDown = When Key Is Pressed
- I was able to use KeyUp for vbKeyEscape, but not for vbKeyReturn. While both worked w/ KeyDown. There for I'll only use KeyDown moving forward.

```
Private Sub TextBox2_KeyUp(ByVal KeyCode As MSForms.ReturnInteger, ByVal Shift As Integer)
    If KeyCode = vbKeyReturn Then
        Call OkButton_Click
    ElseIf KeyCode = vbKeyEscape Then
        Call CancelButton_Click
    End If
End Sub
```
