

Change WordPress Upload Limit - Self Hosted Website

Note: Your PHP Main Config file may be elsewhere, read below to figure it out!

You need to create test.php in your webroot, if its /var/www/html/ then here is an example.

```
sudo sh -c 'echo "<?php\nphpinfo();\n?>" >> /var/www/html/test.php'
```

test.php

```
<?php
    phpinfo();
?>
```

Now edit the file:

```
sudo nano /etc/php5/apache2/php.ini && sudo reboot
sudo nano /etc/php/7.0/apache2/php.ini && sudo reboot
```

Find the follow 2 parts and change them >>

```
;;;;;;;;;;;;;
; Data Handling ;
;;;;;;;;;;;;;

##LOTS OF LINES OF CODE

; Maximum size of POST data that PHP will accept.
; Its value may be 0 to disable the limit. It is ignored if POST data reading
; is disabled through enable_post_data_reading.
; http://php.net/post-max-size
##Change >> post_max_size = 8M
post_max_size = 64M
