

Install Transmission BitTorrent Headless - Ubuntu 14

```
sudo apt-get update
sudo apt-get install -y transmission-cli transmission-common transmission-daemon
sudo service transmission-daemon stop
```

Edit the config file, its pretty self explanatory..

```
nano /etc/transmission-daemon/settings.json
```

Big things are DL Dir, and Username/PWD and Accessible IP's

```
"download-dir": "/mnt/torrents",
"rpc-password": "password",
"rpc-port": 9091,
"rpc-username": "username",
"rpc-whitelist": "127.0.0.1,*.*.*.*",
```

```
sudo service transmission-daemon start
```

```
http://IP:9091
```

Windows Client:
