

# Open New Browser Tab PHP

<http://board.phpbuilder.com/showthread.php?10369260-PHP-echo-to-open-new-window>

```
<?php
echo '<script type="text/javascript" language="javascript">
window.open("http://www.something.com");
</script>';
?>
```

Pass Variables and get them in next script:

```
JS method:
window.open("http://mysite.com/myfile.php?var1=foo&var2=bar");
myfile.php
<?php
    $var1 = $_GET['var1'];
    $var2 = $_GET['var2'];
    ...
?>
```

Pass back file via readfile as per normal

Pass PHP Variable inside javascript:

- Use string interpolation with double quotes for the echo statement and single quotes everywhere inside the javascript

<http://stackoverflow.com/questions/42498574/php-pass-variable-to-new-window-open-javascript/42498945#42498945>

```
$link = "http://newpage.com$file";

echo "<script type='text/javascript' language='javascript'>
window.open('$link');
</script>";
```
