

# Using Functions in VBA to get Result

<https://stackoverflow.com/questions/55585923/set-vba-variable-to-result-from-function-which-is-string>

```
Public Function Test(var As String) As String
    Test = var & " World"
End Function

Sub testing()
    returnstr = Test("Hello")
    MsgBox returnstr
End Sub
```
