

# Virsh Pool Management Commands

<https://serverfault.com/questions/840519/how-to-change-the-default-storage-pool-from-libvirt/840520#840520>

## Listing current pools:

```
virsh pool-list
```

## Destroying pool:

```
virsh pool-destroy default
```

## Undefine pool:

```
virsh pool-undefine default
```

## Defining a new pool with name "default":

```
virsh pool-define-as --name foo--type dir --target /path/bar
```

## Set pool to be started when libvirt daemons starts:

```
virsh pool-autostart default
```

## Start pool:

```
virsh pool-start default
```
