

Install NoVNC with Websockify - Ubuntu Server 14.04

```
echo y | sudo apt-get install git websockify
git clone git://github.com/kanaka/noVNC
```

Launch without WSS/SSL support:

```
./noVNC/utils/launch.sh --vnc [IP]:[PORT]
```

Launch with WSS/SSL support:

```
./launch.sh --cert /path/self.pem --vnc [IP]:[PORT]
```

Creating Self.pem

```
cat domain.cert domain.key > self.pem
```
