

Install ZoneMinder - Ubuntu

Ubuntu via IConner PPA:

<https://wiki.zoneminder.com/Ubuntu>

```
sudo su
```

```
apt install -y software-properties-common  
echo "" | add-apt-repository ppa:iconnor/zoneminder-master  
apt-get update  
apt-get install -y zoneminder
```

Note: This is the latest/best method IMO using NGinX/MariaDB backends

https://wiki.zoneminder.com/Ubuntu_Server_18.04_64-bit_with_Zoneminder_1.32.x_the_easy_way#Ubuntu_18.04_LEMP_.28NGINX.2C_Mariadb.2C_PHP.29

Forward **domain.com** to **domain.com/zm**

```
sh -c 'echo "RedirectMatch ^/$ /zm/" >> /etc/apache2/apache2.conf' && service apache2 restart
```
