

Fix Outdated-Broken-Old Repo's Ubuntu - Debian

```
sudo cp /etc/apt/sources.list /etc/apt/sources.list.broken

sudo sed -i -re 's/([a-z]{2}\.)?archive.ubuntu.com|security.ubuntu.com/old-releases.ubuntu.com/g' /etc/apt/sources.list

sudo apt-get update
```

<http://askubuntu.com/questions/91815/how-to-install-software-or-upgrade-from-an-old-unsupported-release>

Here is an example for Debian Squeeze:

```
nano /etc/apt/sources.list
```

```
deb http://archive.debian.org/debian squeeze main
deb http://archive.debian.org/debian squeeze-lts main
deb http://archive.debian.org/debian-backports squeeze-backports main
```

The second line will fail with an "expired" type message, so you also need to add the following in /etc/apt/apt.conf (create it if it doesn't already exist):

```
nano /etc/apt/apt.conf
```

```
Acquire::Check-Valid-Until false;
```
