

RSync - Common Flags

RSync is a great tool!

To run it in the background use:

```
nohup [rsync command] > nohup.log &
```

Useful Flags:

```
-n,          --dry-run perform a trial run with no changes made
-v,          --verbose increase verbosity
-a,          --archive archive mode; equals -rlptgoD (no -H,-A,-X)
-P,          --progress show progress during transfer
--remove-source-files  --sender removes synchronized files (non-dir)
--delete     --delete extraneous files from dest dirs
-z,          --compress compress file data during the transfer
--iconv=iso-8859-1,utf8  ==--iconv=[localenc],[remoteenc] (Conv. Enc. on the fly)
```
