

Enable RSA Key Authentication with ESXI 6.0 - One Command

This assumes you already have the RSA_Key.

Read The detailed [KB here](#).

```
sh -c "echo '[RSAKEY]' >> /etc/ssh/keys-root/authorized_keys" && sh -c "echo 'ChallengeResponseAuthentication no' >> /etc/ssh/sshd_config" && /etc/init.d/SSH restart
```

Replace [RSAKEY] with your id_rsa.pub

ChallengeResponseAuthentication no = Disable Password Login
