

# OpenSuse - SLES

These Repo's seem to be updated with the latest client, and I don't use SLES much. Infact only with the VMA for VMWare, but it was so easy to find the repos, if all OpenSuse pages are like this, I'd almost want to switch! (I'm too far dedicated to Ubuntu at the moment though, so I'd need a good reason!)

<http://software.opensuse.org/download.html?project=home%3Ajochenbecker&package=xymon-client>

**Find Version :**

```
cat /etc/SuSE-release
```

**SLE:**

**For SLE 12 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/SLE_12/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```

**For SLE 11 SP3 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/SLE_11_SP3/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```

**For SLE 11 SP1 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/SLE_11_SP1/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```

**For SLE 11 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/SLE_11/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```

**OpenSuse:**

**For openSUSE 13.2 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/openSUSE_13.2/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```

**For openSUSE 13.1 run the following as root:**

```
zypper addrepo http://download.opensuse.org/repositories/home:jochenbecker/openSUSE_13.1/home:jochenbecker.repo
zypper refresh
zypper install xymon-client
```
