

OpenProject - Create payload.json Script with Arguments for API POST via CURL

```
cat << 'EOL' >create_payload.json
#!/bin/bash

SUBJECT=$1

cat << EOF >payload.json
{
  "subject": "$SUBJECT",
  "description": {
    "format": "textile",
    "raw": "An issue has been detected by XYMon - Please Investigate, Document and Acknowledge Error"
  },
  "_links": {
    "type": {"href": "/api/v3/types/1"},
    "status": {"href": "/api/v3/statuses/1"},
    "priority": {"href": "/api/v3/priorities/8"}
  }
}
EOF
EOL
chmod +x create_payload.json
./create_payload.json "TEST SUBJECT"
cat payload.json
```
