

# Click Buttons in Internet Explorer via VBA

## By Class Name:

**Note:** Elements or Element, if Elements then you must specify index of collection via "(0)" = first object

### VBA:

```
IEObj.Document.GetElementsByClassName("ui-pg-button ui-corner-all")(0).Click
```

### HTML:

```
<td class="ui-pg-button ui-corner-all" title="Paste from clipboard">
```

## By Title:

### VBA:

```
IEObj.document.getElementById("buttonExcel").Click  
IEObj.document.getElementById("editText").Value = "TEST"
```

### HTML:

```
<button id="buttonExcel" class="
```

## Sometimes you need to Update via event (OnChange):

<https://stackoverflow.com/questions/39827461/excel-vba-ie-11-unable-to-refresh-page-after-selecting-value-in-a-dropdown>

```
IEObj.document.getElementById(HSEProfileDropDownStr).Value = "UpdatedValue"  
Application.Wait (Now() + TimeValue("00:00:01"))  
IEObj.document.getElementById(HSEProfileDropDownStr).FireEvent ("onchange")
```
