

Copy Text from Microsoft Word to New Excel Workbook - VBA

Open a new Doc, type some text and select to test.

```
Sub CopyToNewExcelWBFromDoc()  
  
    'Word  
    Dim objWord As Object      'Word.Application  
    Set objWord = GetObject(, "Word.Application")  
    objWord.Selection.Copy ' Select text from Word Doc  
  
    'Excel  
    Dim objExcel As Object, objWB As Object  
    Set objExcel = CreateObject("Excel.Application")  
    Set objWB = objExcel.Workbooks.Add  
    objExcel.Visible = True  
  
    'Paste into new workbook  
    Set wb = objExcel.ActiveWorkbook  
    Set ws = wb.Worksheets("Sheet1")  
  
    With ws  
        .Range("A1").Select  
        .Paste  
    End With  
  
End Sub
```
